Alternative Energy Awareness

I was born in Tennessee in 1985 and moved to Ohio only a few weeks later where I have lived since. I am a web and graphic designer who has been creating and developing web pages and digital graphics since 1998. I have always considered myself a creative person because I have always enjoyed arts and crafts. When I was little I spent many hours creating my own structures with Lego pieces, Lincoln Logs, clay, Play-Doh, and even playing cards. I enjoy sketching, drawing, taking photographs, and creating abstract digital imagery in my free time. I have pursued careers in Information Technology and Architecture before ultimately deciding to do what I truly love, graphic design. I am a goal-oriented, determined, and open-minded individual. I enjoy technology, nature, snowboarding, skateboarding, art, music, dancing, learning new things, and I am always up for new challenges. I am not afraid to try new things and I take pride in successfully completing my goals. I am a clear communicator and a great listener. I work very well with others and feel that collectively thinking increases productivity. I strive to do the best work that I can which requires me to be constantly aware of new trends as well as what is successful in the market. I am inspired to inspire.
